EDUCATION

New York University | B.A. Data Science and Business Studies, GPA 3.6

Aug 2022 – May 2026

EXPERIENCE

micro1

June 2026 - Present

Data Scientist AI Training Expert

Remote

- Designed and evaluated multi-step agentic AI workflows across Google Drive, Gmail, Google Sheets, Google Calendar, and LinkedIn, assessing model performance on accuracy, autonomous reasoning, and cross-application task execution
- Built synthetic data environments with deliberate ambiguity and conflict to stress-test frontier AI models, calibrating prompt and environment difficulty to target specific failure modes

Sallie Mae

May 2025 - May 2026

Data Analyst Intern

Indianapolis, Indiana

- Improved data accessibility across 500+ enterprise users by building Python API integrations with Alation data catalog and developing SQL-based data pipelines to automate metadata accuracy workflows for cross-functional stakeholders
- Accelerated business intelligence adoption by 30% by creating Tableau and PowerBI dashboards tracking data quality metrics and presenting insights to Chief Data Office leadership to inform governance roadmap priorities

NYU Athletics

October 2023 - Present

Varsity Athletics Special Events and Ticketing Assistant

- Increased operational efficiency by 25% by generating automated reports analyzing attendance patterns, revenue trends, and fan engagement metrics to support data-driven event planning decisions.

PROJECTS

Cookie Cats A/B Test Analysis

R, Statistical Analysis, A/B Testing, ggplot2

- Quantified \$246K annual revenue impact by conducting two-proportion z-tests in R across 90,189 players, identifying a 4.6pp retention decline among high-value users
- Built R Markdown dashboards visualizing engagement metrics, segmentation analysis, and statistical confidence intervals to communicate business impact to non-technical stakeholders

GA4 E-Commerce Business Insights

SQL, BigQuery, Tableau, Customer Analytics

- Uncovered \$17.7K revenue recovery opportunity by analyzing 270,000 users in BigQuery, identifying 93.6% customer churn and building cohort retention models that revealed a critical Month 1 re-engagement window
- Developed automated SQL pipelines and Tableau dashboards tracking engagement metrics, purchase patterns, and channel attribution for cross-functional stakeholders

Regional Music DNA

Python, API Integration, Data Pipeline

- Analyzed 500,000+ song streams across 20 major US cities by engineering a Python data pipeline integrating Spotify Web API, Last.fm API, and US Census Bureau data to process audio features and demographic correlations
- Built automated ETL workflows to map regional engagement patterns and identify musical borders transcending political boundaries

Streaming vs. Theatrical Analytics

Tableau, API Integration, Business Strategy

- Quantified a 2,437% ROI differential for Action films by analyzing 530 movies using TMDb API and SQL to compare theatrical vs. streaming release performance
- Informed \$10-50M release windowing strategies by building an interactive Tableau dashboard enabling studio executives to explore genre-specific performance patterns

SKILLS

Technical Skills: Python (Pandas, NumPy), R (tidyverse, ggplot2), SQL, BigQuery, Snowflake, dbt, Airflow, AWS, GCP, GitHub, Alation, prompt engineering, agentic AI evaluation

Analytics & Visualization: A/B testing, statistical hypothesis testing, ETL workflows, data pipelines, Tableau, PowerBI, API integration, data governance

Languages: English (fluent), Spanish (fluent), Mandarin (basic)
